Inviting Members to an Organization

Once an organization application is approved, the originating user is the account owner and admin, and can login using their PubSafe app credentials.

Inviting Members to Your Organization

The next step is to invite people to join the organization from the web portal by sending invites or sharing a unique join link or QR code. **All PubSafe users must install the PubSafe mobile app and upgrade to the Pro version to join an organization.**

[Watch Video - How to Invite Member to Your Organization](#)

Sharing Options Include:

- Email link
- Copy link for SMS
- Scanning & sharing QR code

Since links can be freely shared with anyone after being sent, people must request to join an organization, and an organization administrator must give final approval. Members can be approved or rejected at any time. Follow the numbered steps below to approve a user. If in doubt, leave the option set to the default.
