Changing Organizations

Prerequisites

1. You must have the PubSafe app
2. You must upgrade to the Pro version of the PubSafe app
3. You must be invited and then approved by the org admin.
4. The org admin will assign a role which determines what you can see and access.

Users can switch between orgs at any time. The number orgs you can join is determined by your PubSafe app version.

The last org selected and saved in the portal is the org that will be used on login.

Under the user profile in the top right, select Profile. Change the "Current Organization" from the drop menu showing orgs you have joined. Click save. When you log back in, the org will have changed. You can confirm this by seeing the org listed under the Profile menu (top right).
