How do I integrate with PubSafe?

PubSafe is open to sharing information provided the PubSafe privacy, location, and data use policy is maintained. To connect to PubSafe data an organization must identify a viable use such as public benefit research by a university, FEMA or DHS in relation to rescue and relief operations. Connections for the purpose of law enforcement or other non-rescue and relief operations are not allowed.

Data is shared using industry-standard APIs. Contact us through the website to initiate discussion.
