Communication, Alerts, Teams & Organizations What is a Local Gov Emergency Number?

This is the number you call in your area when there is an emergency. In the United States, it is 911, in most of Europe, it is 112. This number is tied to the Click to Call Emergency Services in many areas of the application. When traveling, you must update this number. If you are unsure of the number in your area, try searching the Internet.
